

PROFESSIONAL FILTRATION PHARMACEUTICAL

HiFlux Auto-line® filters are specially designed for automatic filtration of pharmaceutical products.

World leading company producing customized hygienic filter solutions. Increased security, productivity and better profitability.

HiFlux Filtration A/S

About the Auto-line® Automatic filter:

The Auto-line filter is used at many pharmaceutical companies in Europe for filtration of pharmaceutical products.

Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

After installation:

Automatic process, increased productivity, minimal maintenance, no production stops.

Facts for the Auto-line® Automatic filter

Complies to the regulations EC1935/2004 and EU 10/2011, as well as the FDA standards. CIP friendly design with respect to the hygienic design recommendations by the European Hygienic Equipment Design Group (EHEDG).

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 30 micrometers [μm].

Did you know?

That, filtration is a valuable and necessary aspect of any pharmaceutical system. Using appropriate filtration allows for the purification of media and the removal of particles or other contaminants within the system. The Auto-line offers many advantages such as a closed system and no human involvement in order to achieve a high security and a cleaner end product. We offer various solutions for ATEX environments and have delivered customized solutions for our customers.
